SEO Results

Your SEO could be better

Your page has some level of optimization but could be improved further. SEO optimization is important to ensure you can maximize ranking potential and drive traffic to your website from search engines. You should ensure your page fulfils common recommended improvements outlined here before moving onto more advanced SEO strategies.

HTML HEADER

Title Tag ✓

You have a title tag of optimal length (between 10 and 70 characters).

Tronweb – Web Solutions and Consultancy Agency

Length : 46

Meta Description Tag ✗

Your page appears to be missing a meta description tag. A meta description is important for search engines to understand the content of your page, and is often shown as the description text blurb in search results.

BODY CONTENT

Header Tags ✓

Your page is making good use of header tags.

HTML header tags are an important way of signaling to search engines the important content topics of your page, and subsequently the keywords it should rank for.

Header Tag	Frequency	
H1	4	
H2	1	
H3	3	
H4	11	
H5	10	
H6	0

Keyword Consistency ✗

Your page's main keywords are not distributed well across the important HTML tags.

Your page content should be focused around particular keywords you would like to rank for. Ideally these keywords should also be distributed across tags such as the title, meta and header tags.

Performance Results

Your performance could be better

Your page's performance has some issues and room for improvement. Performance is important to ensure a good user experience, and reduced bounce rates (which can also indirectly affect your search engine rankings). We recommend addressing the highlighted factors below.

Page Speed Info

Your page's server response time is reasonably low which is good for load speed and user experience.

Page Size Info

Your page's file size is quite large which, regardless of other optimizations, can reduce load speed and impact user experience. A general rule is to keep your page under 5MB in total file size.

Number of Resources

This check displays the total number of files that need to be retrieved from web servers to load your page. As a general rule, having more files to retrieve increases the number of server requests and can subsequently increase page load time. It is a good idea to removing unnecessary files or consolidate files like styles and scripts where possible.

Google Accelerated Mobile Pages (AMP)

This page does not appear to have AMP Enabled.

JavaScript Errors

Your page is not reporting any JavaScript errors.

GZIP Compression

Your website is using GZIP compression.

Optimize Images

All of the images on your page appear to be optimized.

Minification

Some of your JavaScript or CSS files do not appear to be minified.

Deprecated HTML

No deprecated HTML tags have been found within your page.

Inline Styles

Your page appears to be using inline styles. Inline styles are an older coding practice and discouraged in favor of using CSS style sheets, due to their ability to degrade page load performance and unnecessarily complicate HTML Code.

Social Results

Your social needs improvement

You appear to have a weak social presence or level of social activity (or we may just not be able to see your profiles!). Social activity is important for customer communication, brand awareness and as a marketing channel to bring visitors to your website. We recommend that you list all of your profiles on your page for visibility, and begin to build a following on those networks.

Facebook Connected

Your page has a link to a Facebook Page.

Facebook Open Graph Tags

Your page is using Facebook Open Graph Tags.

Show details

Facebook Pixel

We have not detected a Facebook Pixel on your page.

Facebook's Pixel is a piece of analytics code that allows you to track users retarget them with Facebook Ads in future.

Twitter Connected

No associated Twitter profile found as a link on your page.

Twitter Cards

We have not detected Twitter Cards on your page.

Twitter Cards are a type of structured data that can be placed on your page to control what content is shown when a page is shared on Twitter.

Instagram Connected

Your page has a link to an Instagram profile.

YouTube Connected

No associated YouTube channel found linked on your page.

LinkedIn Connected

No associated LinkedIn profile found linked on your page.

Security Results

Your security looks good

Overall, your website appears secure though you may want to address the highlighted items. Security is important to ensure your website protects user data, doesn't become compromised or experience downtime or data loss. We recommend ongoing patching and the continuous use of protective monitoring tools.

SSL Enabled

Your website has SSL enabled.

HTTPS Redirect

HTTPS Redirects 

Your page successfully redirects to a HTTPS (SSL secure) version.

Email Privacy

Email addresses have been found in plain text. We recommend removing any plain text email addresses and replacing them with images or contact forms. Plain text email addresses can be susceptible to scrapers and email spammers.
